## Manufacturing Instructions – Part A

- Charge components 1 and 2 and stir homogeneous at low shear
- Once the mixture is homogeneous add component 3
- Slowly add components 4-6 while increasing the speed to 10-20m/s
- Grind with high-speed disperser at approx. 10-20m/s for 15 minutes
- Slowly add component 7 whilst adding part of the water if required
- Add the remaining components 8 and 9 at low shear rate and mix for 5 minutes

NOTE: Component 9 is a 2 wt% dispersion of thixotropic agent in water.

Finally mix PART A and PART B under low shear mechanical mixing for 2-3 minutes until the system in homogeneous. The formulated system is now ready to apply.
